

Equity Statement for SR22-16
On Sexual Assault Data

This current resolution is a follow-up to *SR22-6, Recommendations Related to Allegations of Sexual Assault and Abuse in Schools*. There is a need for transparency and clarity around specific data points so that all stakeholders can readily access information on the topic regardless of time and other resources they may have to investigate claims.

The State Board believes these recommendations will increase equity in the education system in the District of Columbia by supporting students' overall safety and well-being, as well as creating supportive educational environments for children regardless of gender or sexual orientation.
